

Complement your curriculum with ECTS-recommended industry micro-credentials

This initiative supports universities to easily assess prior learning and potentially recognize credit for quality-assured industry micro-credentials from Google and IBM.

86 %

of students agree that a Professional Certificate will help them succeed in their job¹

72 %

of employers say they are more likely to hire a student with a Professional Certificate¹

1 in 2

students want a Professional Certificate offered for credit¹

ECTS-recommended courses on Coursera

Awarded recommendations for 4 to 9 ECTS credits each, these certificates can integrate into academic programs as modular components, aligning with EQF levels 5 and 6 for seamless course incorporation.

We are actively expanding our portfolio with additional Professional Certificates, currently under review for ECTS alignment. Stay connected for new inclusions and updates.

Data Analytics with Excel and R	4
Data Analyst	6
Full Stack Software Developer	6

Benefits of ECTS

Flexibility

Allows learners to accumulate credits at different institutions and countries.

Quality Assurance

Helps ensure high standards are maintained across participating institutions.

Transparency

Facilitates the recognition of periods of learning by other institutions.

Implementation strategies

Transfer credits

Recognize prior learning for-credit based on recommendations from independent third parties.

Optional benefit

Offer Professional Certificates to all students to enhance their employability.

Blended content

Enrich core academic programs with job-ready skills by integrating Professional Certificates.

Elective courses

Augment your curriculum with a variety of industry content including electives that focus on emerging skills.

Alumni benefit

Offer Career Academy to provide alumni access to in-demand skills, adding value without extra costs.

Discover how other institutions incorporate Professional Certificates into their curriculum.
